2014 Research Day
College of Sciences and Health Professions
Friday, April 4, 2014
Student Center Ballroom (SC 311), 2121 Euclid Avenue
Cleveland State University

Christine S. Moravec, Ph.D.
Director of Basic Research, Kaufman Center for Heart Failure,
Director of the Human Heart Tissue Bank, and Director of the Basic
Science Curriculum, Cleveland Clinic Lerner College of Medicine

“Remodeling the Failing Human Heart”

Dr. Moravec’s research focuses on human heart failure. Particularly understanding the cellular abnormalities in the failing heart and the potential for reversing these changes with drugs, devices or psychophysiologic interventions.

Robert Klatzky, Ph.D.
Charles J. Queenan Jr Professor of Psychology and faculty at the Center
for the Neural Basis of Cognition and Human-Computer Interaction,
Carnegie Mellon University

“How do we Make Sense of a Multi-Sensory World?”

Dr. Klatzky’s research investigates perception, spatial thinking and action from the perspective of multiple modalities, sensory and symbolic, in real and virtual environments. Her basic research has been applied to tele-manipulation, image-guided surgery, navigation aids for the blind and neural rehabilitation.

This event is free, but registration is required. Register here by noon on Monday, March 31, 2014. For information call the COSHP Dean’s Office at 216-687-5580.
